

INNOVATIVE TEACHING TOWARDS FOSTERING CREATIVE LEARNING

WHERE THE
BEST★
ARE TRAINED

AIC'S FACULTY DO MORE THAN 'TEACH'. THEY LISTEN, PROVOKE AND CHALLENGE

Course Overview

This workshop will provide participants with an understanding on how to experiment methods and strategies to improve children engagement, motivation and attainment. The module allows learners to apply using innovative teaching methods such as project-based learning, non-formal education and hands-on experiences within the safe environment.

Scientific research has shown that innovative teaching methods and creative approaches can significantly enhance student learning process. Innovating our teaching methods is no easy feat as it places us out of our comfort zone in a position we may fail to achieve our intended outcomes.

Learning Outcomes

At the end of this module, students may ask yourself the following questions to help you to think about your beliefs regarding fostering Creative Learning Supporting Innovative Teaching:

- Why do you think it is relevant to foster creative learning in facilitating children's learning?
- What will be the benefits for both children and teachers?
- What are your perspective in terms of adopting creative learning for 21st century of learning approach?
- What do you think children may learn and accomplish through this manner of learning?
- What do you understand about innovative teaching?
- What are the strategies of having innovative teaching for young children?
- What methods can you use to innovate your teaching method?
- What are some of the challenges you may face while fostering creative learning to young children?
- What are some of the highlights of learning you have obtained through this module
